

## HSE/SAFETY TRAINING

### Course Overview

This course provides structured and practical training on HSE management and occupational safety in the Nigerian oil and gas industry. It equips participants with the competence to identify hazards, assess risks, implement controls, comply with regulatory requirements, and support safe operations across projects and facilities. The program emphasizes real-world application, regulatory compliance, and incident prevention.

### Course Objectives

By the end of this course, participants will be able to:

- Understand Nigerian oil & gas HSE regulatory requirements
- Apply hazard identification and risk assessment techniques
- Implement permit-to-work and operational safety controls
- Use PPE correctly and enforce safe work practices
- Report, investigate, and prevent incidents
- Respond effectively to emergencies
- Support HSE audits and continuous improvement

### Who should attend?

- Oil & gas field personnel and supervisors
- HSE officers and safety coordinators
- Project managers and engineers
- Contractors and service providers
- Operations and maintenance staff

### Course Duration

- **Basic: 2 days**
- **Intermediate: 3 days**
- **Advanced / Supervisor Level: 5 days**
- **Delivery Mode: Classroom / Site-based / Hybrid**
